Student Annual Performance Dashboard

DAX Formula Reference · Power BI · By Yogesh Gadekar (YSG)

■ **School** Janseva Vidyalaya Wadzire	■ **Table** janseva_vidyalaya_performance	■ **Rows** 720 rows · 24 columns	■ **Period** AY 2022-23 → 2024-25

■■ Calculated Columns — Right-click table → New Column

CC-1

Pass Fail Flag

```
Pass_Fail_Flag =
IF(janseva_vidyalaya_performance[Result] = "Pass",
"Pass", "Fail")
```

■ *Use for conditional formatting — green for Pass, red for Fail*

CC-2

Performance Band

```
Performance_Band =
SWITCH(TRUE(),
[Percentage] >= 85, "Topper",
[Percentage] >= 75, "Above Avg",
[Percentage] >= 50, "Average",
[Percentage] >= 33, "Below Avg",
"Needs Support")
```

■ *Use in slicer to filter students by performance group*

CC-3

Attendance Band

```
Attendance_Band =
IF(
ISBLANK(janseva_vidyalaya_performance[Attendance_Pct]),
"Unknown",
SWITCH(TRUE(),
janseva_vidyalaya_performance[Attendance_Pct] >= 90, "Excellent",
janseva_vidyalaya_performance[Attendance_Pct] >= 75, "Good",
janseva_vidyalaya_performance[Attendance_Pct] >= 60, "Average",
"Poor"))
```

■ *Use in stacked bar chart — Attendance Band by Class*

CC-
4

AY Sort Key

```
AY_Sort_Key =
SWITCH([Academic_Year],
"2022-23", 1,
"2023-24", 2,
"2024-25", 3, 99)
```

■ *Sort Academic_Year axis correctly — Column Tools → Sort by Column → AY_Sort_Key*

CC-
5

Top Performer Flag

```
Top_Performer =
IF(janseva_vidyalaya_performance[Rank_in_Class] = 1,
"Class Topper", "Other")
```

■ *Highlight class toppers in table using conditional formatting*

■ Measures — Home → New Measure

M-0
1

Total Students

```
Total Students =
COUNTROWS(
SUMMARIZE(
janseva_vidyalaya_performance,
janseva_vidyalaya_performance[Student_Name],
janseva_vidyalaya_performance[Class],
janseva_vidyalaya_performance[Division]
)
)
```

■ *Shows 238 unique students — not 720 rows or 12*

M-0
2

Average Percentage

```
Average Percentage =
FORMAT(
AVERAGE(janseva_vidyalaya_performance[Percentage]),
"0.00"
) & "%"
```

■ *Shows 61.78% on card with % sign*

M-0
3

Pass Rate %

```
Pass Rate % =
FORMAT(
DIVIDE(
COUNTROWS(FILTER(janseva_vidyalaya_performance,
[Result]="Pass")),
COUNTROWS(janseva_vidyalaya_performance), 0
) * 100, "0.00"
) & "%"
```

■ *Shows 93.75% — target keep above 90%*

M-0
4

Avg Attendance %

```
Avg Attendance % =
FORMAT(
AVERAGE(janseva_vidyalaya_performance[Attendance_Pct]),
"0.00"
) & "%"
```

■ *Shows 78.19% on card with % sign*

M-0
5

Topper Count

```
Topper Count =
CALCULATE(
COUNTROWS(janseva_vidyalaya_performance),
janseva_vidyalaya_performance[Grade] = "A+"
)
```

■ *Count of A+ grade students — shows 60*

M-0
6

Fail Count

```
Fail Count =
CALCULATE(
COUNTROWS(janseva_vidyalaya_performance),
janseva_vidyalaya_performance[Result] = "Fail"
)
```

■ *Alert KPI — shows 45 — aim to reduce every year*

M-0
7

Avg Marathi

```
Avg Marathi =
AVERAGE(janseva_vidyalaya_performance[Marathi])
```

■ *Use in subject comparison bar chart*

M-08

Avg Hindi

```
Avg Hindi =
AVERAGE(janseva_vidyalaya_performance[Hindi])
```

■ *Hindi highest avg at 62.2*

M-09

Avg English

```
Avg English =
AVERAGE(janseva_vidyalaya_performance[English])
```

■ *Use in subject comparison bar chart*

M-10

Avg Mathematics

```
Avg Mathematics =
AVERAGE(janseva_vidyalaya_performance[Mathematics])
```

■ *Use in subject comparison bar chart*

M-11

Avg Science

```
Avg Science =
AVERAGE(janseva_vidyalaya_performance[Science])
```

■ *Use in subject comparison bar chart*

M-12

Avg Social Science

```
Avg Social Science =
AVERAGE(janseva_vidyalaya_performance[Social_Science])
```

■ *Lowest avg at 61.6 — needs attention*

M-13

Needs Support

```
Needs Support =
CALCULATE(
COUNTROWS(janseva_vidyalaya_performance),
janseva_vidyalaya_performance[Performance_Category]
= "Needs Support"
)
```

■ *Students needing extra help — use as alert card*

M-1
4

YoY Improvement %

```
YoY Improvement % =
VAR CY = AVERAGE(janseva_vidyalaya_performance[Percentage])
VAR PY = CALCULATE(
AVERAGE(janseva_vidyalaya_performance[Percentage]),
janseva_vidyalaya_performance[Academic_Year] = "2023-24")
RETURN DIVIDE(CY - PY, PY, BLANK()) * 100
```

■ *Year over year improvement trend*

M-1
5

Class Average %

```
Class Average % =
CALCULATE(
AVERAGE(janseva_vidyalaya_performance[Percentage]),
ALLEXCEPT(
janseva_vidyalaya_performance,
janseva_vidyalaya_performance[Class]
)
)
```

■ *Compare individual student vs class average in table*
