

■ Student Annual Performance Dashboard

Janseva Vidyalaya Wadzire, Maharashtra 414302 · Class 5 to 10 · Power BI · By Yogesh Gadekar (YSG)

■ **Table** janseva_vidyalaya_performance

■ **Rows / Cols** 720 rows · 24 columns

■ **School** Janseva Vidyalaya Wadzire

■ **Period** AY 2022-23 → 2024-25

■ DAX — Calculated Columns & Measures

■ Calculated Columns — Right-click table → New Column

CC-1

Pass / Fail Flag

```
Pass_Fail_Flag =  
IF(janseva_vidyalaya_performance[Result] = "Pass",  
"■ Pass", "■ Fail")
```

■ Use for conditional formatting in table visual — green pass, red fail

CC-2

Performance Band

```
Performance_Band =  
SWITCH(TRUE(),  
janseva_vidyalaya_performance[Percentage] >= 85, "■ Topper",  
janseva_vidyalaya_performance[Percentage] >= 75, "■ Above Avg",  
janseva_vidyalaya_performance[Percentage] >= 50, "■ Average",  
janseva_vidyalaya_performance[Percentage] >= 33, "■ Below Avg",  
"■ Needs Support")
```

■ Use in slicer to filter by performance group

CC-3

Attendance Band

```
Attendance_Band =  
SWITCH(TRUE(),  
janseva_vidyalaya_performance[Attendance_Pct] >= 90, "Excellent",  
janseva_vidyalaya_performance[Attendance_Pct] >= 75, "Good",  
janseva_vidyalaya_performance[Attendance_Pct] >= 60, "Average",  
"Poor")
```

■ Use in bar chart to show attendance distribution

CC-4

AY Sort Key

```
AY_Sort_Key =  
SWITCH(janseva_vidyalaya_performance[Academic_Year],  
"2022-23", 1, "2023-24", 2, "2024-25", 3, 99)
```

■ Sort Academic_Year axis correctly — Sort by Column → AY Sort Key

CC-5

Subject Topper Flag

```
Top_Performer =  
IF(janseva_vidyalaya_performance[Rank_in_Class] = 1,  
"Class Topper", "Other")
```

■ Highlight class toppers in table — use conditional format

■ Measures — Home → New Measure

M-0
1

Total Students

```
Total Students =  
DISTINCTCOUNT(janseva_vidyalaya_performance[Student_ID])
```

■ KPI Card · Total unique students enrolled

M-0
2

Average Percentage

```
Average Percentage =  
AVERAGE(janseva_vidyalaya_performance[Percentage])
```

■ KPI Card · Overall school average performance

M-0
3

Pass Rate %

```
Pass Rate % =  
DIVIDE(  
COUNTROWS(FILTER(janseva_vidyalaya_performance,  
janseva_vidyalaya_performance[Result]="Pass")),  
COUNTROWS(janseva_vidyalaya_performance), 0  
) * 100
```

■ KPI Card · % students who passed · target > 90%

M-0
4

Avg Attendance %

```
Avg Attendance % =  
AVERAGE(janseva_vidyalaya_performance[Attendance_Pct])
```

■ KPI Card · School average attendance

M-0
5

Avg Marathi Marks

```
Avg Marathi =  
AVERAGE(janseva_vidyalaya_performance[Marathi])
```

■ Use in subject comparison bar chart

M-0
6

Avg Hindi Marks

```
Avg Hindi =  
AVERAGE(janseva_vidyalaya_performance[Hindi])
```

■ Use in subject comparison bar chart

M-0
7

Avg English Marks

Avg English =
`AVERAGE(janseva_vidyalaya_performance[English])`

■ Use in subject comparison bar chart

M-0
8

Avg Mathematics Marks

Avg Mathematics =
`AVERAGE(janseva_vidyalaya_performance[Mathematics])`

■ Use in subject comparison bar chart

M-0
9

Avg Science Marks

Avg Science =
`AVERAGE(janseva_vidyalaya_performance[Science])`

■ Use in subject comparison bar chart

M-1
0

Topper Count

Topper Count =
`CALCULATE(
COUNTROWS(janseva_vidyalaya_performance),
janseva_vidyalaya_performance[Grade] = "A+"
)`

■ KPI Card · Number of A+ students

M-1
1

Needs Support Count

Needs Support =
`CALCULATE(
COUNTROWS(janseva_vidyalaya_performance),
janseva_vidyalaya_performance[Performance_Category] = "Needs Support"
)`

■ Alert card · Students needing extra attention

M-1
2

Class Average %

Class Average % =
`CALCULATE(
AVERAGE(janseva_vidyalaya_performance[Percentage]),
ALLEXCEPT(janseva_vidyalaya_performance,
janseva_vidyalaya_performance[Class])
)`

■ Compare individual student vs class average in table

YoY Improvement %

```

YoY Improvement % =
VAR CY = AVERAGE(janseva_vidyalaya_performance[Percentage])
VAR PY = CALCULATE(
    AVERAGE(janseva_vidyalaya_performance[Percentage]),
    janseva_vidyalaya_performance[Academic_Year] = "2023-24"
)
RETURN DIVIDE(CY - PY, PY, BLANK()) * 100

```

- Shows improvement trend year over year

Fail Count

```
Fail Count =  
CALCULATE(  
COUNTROWS(janseva_vidyalaya_performance),  
janseva_vidyalaya_performance[Result] = "Fail"  
)
```

- *Alert KPI — track and reduce failures*

Avg Social Science

```
Avg Social Science =  
AVERAGE(janseva_vidyalaya_performance[Social_Science])
```
